

# How Do You Like Your Eggs?

### Article written by Nancy Frecks (nancy.frecks@unl.edu), MS, Extension Educator

How do you like to eat your eggs? Do you like them scrambled or fried? Cold or warm? On toast or in a tortilla? How about an egg in a hole, or in a cup? No matter how you like to eat your eggs, they are full of good nutrition, easy to prepare, inexpensive, and can be a part of a healthy diet especially for growing children. Simply put eggs are eggs; there is nothing else in them, just one ingredient...egg.

# Eggs Facts from the American Egg Board

- One egg has 6 grams of high-quality protein and about 70 calories.
- Eggs have all 9 essential amino acids and 13 essential vitamins and minerals.
- They are the least expensive source of high-quality protein. Usually, costing less than 20 cents per egg.
- Eggs are a good source of choline. Choline promotes normal cell activity; liver function and helps transport nutrients throughout the body.
- There are 7 to 17 thousand little tiny pores on one eggshell.
- Double-yolked eggs often come from hens that are young and their egg production cycles are not yet synchronized or by hens old enough to produce extra-large eggs.

#### Food Safety Tips:

- Wash your hands and any surfaces or utensils that come in contact with raw eggs.
- Cook eggs until the whites and yolks are firm or an internal temperature of 160°F is reached in dishes containing eggs, like egg casseroles.
- Eggs should be kept at 33-40°F and should be discarded after two hours if left at room temperature.

Nebraska Extension is a Division of the Institute of Agriculture and Natural Resources at the University of Nebraska–Lincoln cooperating with the Counties and the United Sates Department of Agriculture.

Nebraska Extension educational programs abide with the nondiscrimination policies of the University of Nebraska– Lincoln and the United States Department of Agriculture.

## Hard Cooking Eggs on the Stove Top

- 1. Place uncooked eggs in a single layer on the bottom of a saucepan.
- 2. Add cold water until the eggs are covered with about an inch of water.
- Heat to boiling. Turn off the heat and cover for 12-18 minutes. Cooking times vary based on the size of the eggs - 9 minutes for medium eggs, 12 minutes for large and 15 minutes for extra-large.
- 4. Remove saucepan from heat and drain.
- 5. Submerge cooked eggs in an ice bath for five minutes to cool eggs.
- 6. Drain and dry eggs. Store in the refrigerator in a clean, dry container.
